About us

Our company started in 1996, when we began providing services for THK Rhythm Automotive Czech a.s. Dačice (formerly TRW-DAS).

During twenty-one years of our activities has our company risen to a high level in flexibility and quality of delivered services. Nowadays we are working on the international level.

The staff of our company are trained in AA number of control and assembly processes. We expect our employees will be trained by new customers in their internal procedures.

kontrolní | montážní | třídící práce
checking | assembling | sorting services

Our services

- Visual inspection, sorting, classification of parts or materials
- Inspection with optical tools (microscope, magnifying glass)
- Inspection with measuring tools (caliper, micrometer, gauge, etc.)
- Cleaning and simple repairs of parts (de-burring, surfaces polishing, bending, drilling, etc.)
- Assembling of simple parts

Certification

Since 2004 our company has been certified by **CSN ISO 9001:2000** certification and since 2015 KOVO-ZACH s.r.o. has been certified by **CSN ISO 9001:2008** by international organisations accredited with TAYLLOR & COX in Czech to providing checking and assembly operations, statistical inspections in mechanical engineering, locksmiths, including CNC machining, forming, welding, laser cutting and surface treatment.

CSN EN ISO 9001:2008

CSN EN ISO 9001:2009

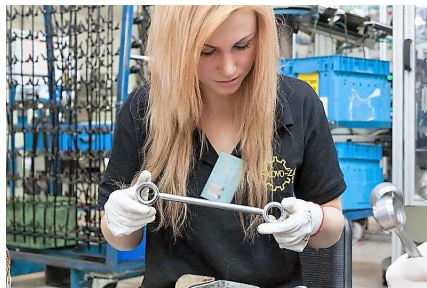

Engineering & Quality

We inspect by visual and by measure tools. All meets the specific customer's requirements. We provide **100% inspection** of all parts.

To enhance security for inspected parts the statistical control is taking in account with **AQL = 0.01**. We are able to give a guarantee of **99.99%** for checking parts - see standards for quality.

Statistical sampling and inspection is a statistically-based method for effective control. It is efficient and provides more security than so-called 100% physical inspection.

Engineering & Quality

Rework and cleaning

De-burring, surfaces polishing, bending, drilling, etc. Simple repairs and cleaning can be carried out in the actual inspection again or according to the customer's demands.

Assembly of the simple parts

Manual or according to agreement by machine. The assembly of simple parts is carried out according to internal procedures or customer drawings. The assembled parts go through the 100% control of our staff to increase the guarantee for the quality of assembly => statistical acceptance AQL = 0.01.

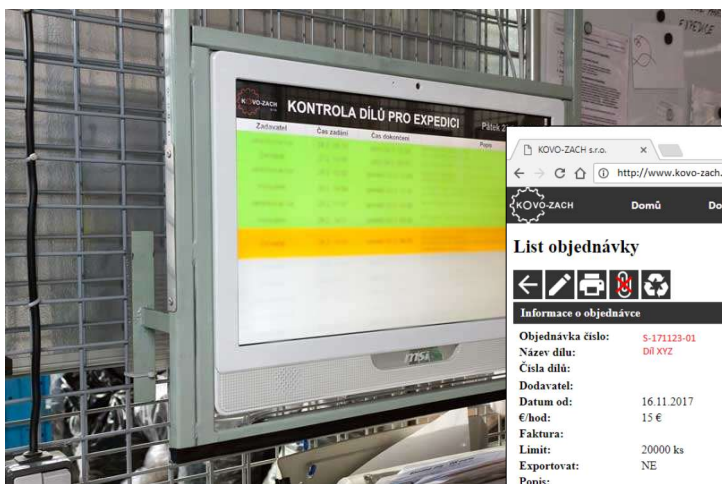

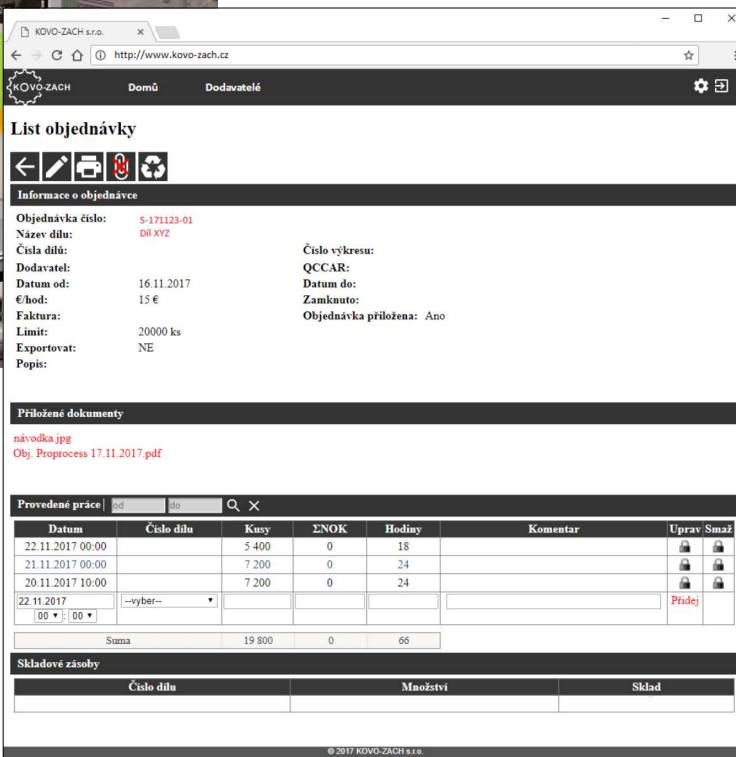

Online

Reports

We developed our own web application **for online monitoring and reporting** for our customers to see actual state of their orders and amount of nOKs.

Reports are also sent to customer in regular intervals per email.
